July 8, 2007

Yes, yes. Allow us to digress from the original assertion that chemtrails may be laced with virus or bacteria. The last question is the most significant, as it deals with SOLUTIONS rather than simply reiterating the problem. We find that far more emphasis is placed upon revealing the problem-which admittedly is of urgent need, exposure being a primary force in awakening of the masses. However, once the problem is unveiled, many times the unsuspecting public is left shattered by realization, yet feeling powerless as to the solution. This is the very thing which leads to apathy.

The modern man, when faced with problems he cannot find immediate answers to, goes into a kind of inactive state, which may even lead to denial. It is in this state of inertia, one may grow to become apathetic.

Now, let us arm modern man with efficient solutions to his problems. Of course, all along we have suggested the use of Agnihotra healing fire to assist beings in their transition into Light. We have suggested as well, utilizing the resultant Ash from this fire, purely because of its healing and transformative properties. It is both energetic as well as physical. It acts on the subtle body as well as the body physical. Therefore, it is a pure substance which can not only heal, but

protect the physical body from the dangers of radioactivity, diseases resulting from pollution, as well as from the normal ailments which beings will notice themselves being even more susceptible to than ever before. The 'common cold' may eventually be so potent as to cause severe reactions in sensitive beings. Now, we would assert the fact that this healing ash alone has the properties which are necessary for curing diseases of all kinds. This coupled with practice of Agnihotra healing fire will certainly fortify beings of Light in facing the perils of future shock.

Indeed, the situation on this planet will be just that-shock. There will be fallout from all sorts of disasters, but many will find solace in safe havens created with care and love for all humanity. Those, whose efforts now often go unheralded and rarely appreciated, will be the ones who will be providing sustenance and peace for many in the times to come. We shall see great events which set humanity back on its heels, so to speak, wreaking havoc in the governments of the world as well as in the resources of the planet. And such times will be back to back, with little relief. Those who are preparing safe havens now will be bringing forth great blessings to this planet in times of crisis.

Therefore, take heart, those of you whose

work appears to be unknown. There will be times when many will come who realize the only places left on this planet which will strengthen and shelter them will be the sites where ancient fires and healing energies are preserved.

July 9, 2007

Yes, extreme causes for distress in the world today. All human beings will be feeling weaker and the ability to focus lessened in the following months. It is due to atmospheric shift, affecting every human on a cellular level. However, those who are surrounded with these healing fires and in an atmosphere which resounds with healing vibrations will fare much better. Therefore, balance your lives. If you must be away from these healing atmospheres, then create such energy field around you when you are outside the 'bubble' so to speak. Indeed, the bubble of harmony and Light will help enable all of you to become stronger, even during a time period which will test everyone's limits!

Take regularly this Agnihotra ash. When outside this environment, take it more frequently, as the energy field around you will likely be compromised. When in the city, be sure to perform these healing fires at the precise time, as this will give an energy boost to the entire system. Utilize the ancient science of Mantra sound healing. Create your

own energy vortex wherever you are. Carry the healing energies with you, but be sure to reactivate them by being quite precise with the timings and by making use of your time. Do not run, run, run without energizing the system. You must take care to energize yourselves with every tool you have.

July 15, 2007

Yes, yes. We shall present interesting situations for our dear Earth inhabitants to ponder. At this point, the beings who have descended upon this planet with the will and yearning to preserve and save this planet from destruction have all been placed in their positions of Light. If indeed there are negative energies out there, as we know there are, these energies cannot penetrate the shield being placed around those Light beings who are present in their hearts with all focus on the Light. The darkness is getting weaker, though it would not appear to be so. The weakness is deadly. The dark forces know their time is up. We who bring forth Light energies to this planet foresee a glorious future for planet Earth, based on the theory of Light which deters darkness at every turn. And this will be so.

Therefore, Light Workers, do not lose faith. Take heart and continue to champion the LIGHT and LOVE which shines through you. Listen to the Inner Voice which will continue

Miracles of Protection at Om Shree Dham Homa Farm

Lee Ringma

to guide you through any times of darkness, personal or collective. Unify and unite. Spread the message of LOVE through the entire galaxy. Affirm it. Live it. Rejoice in it. This will be the future of the planet. The future of the planet is in your hands, collectively.

Beware of the dangers of divisiveness, which the ego champions. The 'them and us' attitude shall not serve the higher good. One must realize one is part of a whole and as important as any spoke on the wheel. Be strong in numbers and united in Light. We salute you, Light Workers of the human race. We join with you in championing the cause of healthy, joyous humanity. OM TAT SAT.

Massive flash floods hit New South Wales, Australia on Saturday, June 10th. Flooding was especially severe all along the East coast north and south of Sydney, including the large city of Newcastle, during the early hours while most people were sound asleep.

The winds were so furious that they blew a 240 meter cargo ship into the shore where it lodged on a sand bank, threatening to break up and spill amounts of oil into the sea. Businesses and homes were flooded, cars floated away and where we are situated in the countryside, whole valleys filled up with water overnight. Many farm animals drowned and many people had to be rescued off their roofs, including our neighbors across the road who are situated closer to the creek that became a raging river.

When we awoke Saturday morning, I saw our front paddock had joined the river that was once a tiny creek. It had risen at least three

stories high overnight and extended from our front paddock across the road to the other side of the valley. Everyone was in shock.

Our front gate and fence line at the road were under water. All our buildings kept dry, the cows had access to higher ground and feed and they were safe.

A couple of seeming miracles took place with our usually dry creek breaking through its banks and flooding the fields where grain had just been planted. **We only lost about an 1/8 of the crop instead of most of it, as the water was somehow diverted. Also right where the hay for the cows was stored, the water course flowed around that, leaving it intact against all odds. Then a pile of heavy timber planks for a future cow shed stored in the front paddock, which was right in the middle of the flood waters, also against all odds floated like a complete unit (despite it being a**

stack of loose planks) lodged against a tree where it stayed until the flood waters receded.

The only thing we lost was the rubbish bin which we found later lodged in a tree down the road.

While others were in total power blackouts, we had solar electricity and we could keep refrigeration going and watch the news on the TV and email until the phone disconnected as well. (Now we are connected to independent satellite broadband to connect to the Internet). Our wood stove kept us warm and heated up water for hot showers. When needed, we put on the generator for extra power. We managed to have stored sufficient food for at least six months as advised by Shree Vasant and also repeatedly referred to in the “Orion Messages”. We also managed to store sufficient cow dung and ghee for one year and 160.000 liters of water

stored in tanks. So even if we were flooded in for a longer period we would have been okay. The next phase is to erect two windmill generators to add to the solar system. The flood was certainly an opportunity to put to test the alternative energy, alternative water supply and food supply.

When these floods hit the coastal areas north and south of Sydney, I had a feeling there would be another flood within the same week. This is what happened. A few days later another warning of flash flooding and gale force winds was issued for the same areas. We were not that affected the second time but many were, and one thousand emergency calls went out.

Then exactly a week after the first flood there was a cyclone warning, level 2, issued for Sydney and the coast north and south of Sydney, with wave warnings of over ten

meters. People were told to stay indoors, away from windows etc. I was very worried about our daughters Suwindi and Ana, who are temporarily living in Sydney. It was to hit Sydney early morning Saturday. Frits had a feeling to do a Rudra after the 4 A.M. mantras that morning. As soon as he started the Rudra the strong winds and rain subsided. In the early morning news reports they said the cyclone had suddenly turned and moved out to sea, due to a current of air coming from inland and pushing it off course.

We are so grateful for the protection Homa provides and for the practical guidance of our Teacher Shree Vasant to prepare for such times.

*All Love and Grace,
Lee and Frits Ringma
Homa Therapy Association Australia*

Agnihotra: A New Dimension

Fivefold Path Mission

Agnihotra was first shown publicly in Poland in 1981 by Vasant and Dr Ulrich Berk at a symposium in Warsaw by Lech Stefanski.

Dr Berk made many visits to Poland to teach Agnihotra in various parts of Poland. It spread in a big way as a healing tool for the family that removes tension on the mind. It was also used for growing small gardens with wonderful results.

After the Chernobyl nuclear accident in 1986, scientists in some Eastern European countries became more curious and wondered how this Agnihotra effect comes about. During his several trips to Eastern Europe, Vasant told the scientists that if they try to look at Agnihotra merely from the point of view of chemistry they might not be able to make much progress. However, if they examine Agnihotra from the point of view of Quantum Physics, they would find a gold mine of knowledge in this ancient Vedic science of healing the atmosphere.

After several experiments, one senior scientist made the following remarks:
"The chemical reactions which take place when Agnihotra pyramid fire, mentioned in Homa Therapy, burns, are less important. Important is the radiation. We know the chemical aspects of fire. In the end we get H₂O, CO₂ and CO. Then there is a visible light and infrared. This is

the classical view today about fire. If you look into the more subtle structure of fire, you find that electrons jump from one atom to another (like a flash of lightning) and this causes some emissions on a very subtle level which hardly fits into modern Quantum Theory."

Vasant also told them, *"If you test Agnihotra with an oscilloscope you will notice a special sound coming from the fire. It is a sound that heals. Other things are there but key is the sound. Fire produces sound but it also reacts to sound. The act of singing special vibrations while the Agnihotra copper pyramid fire burns, creates a resonance effect which invigorates the cells of plants, leading to better reproductive cycles. Resonance plays a vital part in natural phenomena. Here, we are talking about a healing molecular spectrum beyond the whole electromagnetic spectrum."*

The following quotation from the book "Secrets of the Soil" by Peter Tompkins and Christopher Bird.

"Mr Modric, an expert in electromagnetic fields and geopathogenic zones, remarked that the Agnihotra ash could produce disinfectant, anticoagulant and tissue-contracting effects on living matter was well established. He believed Vasant when he claimed the ash had pesticide and fungicidal properties and that it might ultimately solve the problem of mineral deficiencies. Mr Modric explained he believed he

was dealing with a complex that could potentially affect the whole environment, countering the toxins of modern technology developed over the last century by the industrial revolution and that the process might have enormous implications for our very existence.

“He added that Agnihotra ceremonies performed at various specifically spaced points on Earth, if done exactly at sunrise and sunset, could affect an energy associated within the Earth, one such as described by Steiner and Reich, the enhancement of which would have a healing effect on the environment. He said, ‘We believe we can establish the fact of an electromagnetic radiation during the ceremony, but we are in an area of informational transfer through intermolecular and interatomic processes mediated by ultraviolet photons. It is logical to conclude that some kind of energetic mechanism is being activated which can be translated into physical meaning linked to concrete information systems in areas yet unknown but connected to systems of resonance.’”

Healings with Homa Therapy

Lorena I. Soria
Baltimore, Maryland, U.S.A.
Problem: Lung abnormality

I have known Freddie Lawrence for around six years through my husband Michael, who has known him from many years ago. The first time that I had a reiki therapy session with Freddie was probably around five years ago, because I had some abdominal pain. After being with him for around thirty to forty-five minutes, I felt very relaxed and my pain went away in no later than two days.

My second visit was more serious. My doctor found that in the x-ray that was taken two weeks ago there was a questionable abnormality in my lower right lung, and that it needed more research. For that reason, two days later I went for a CAT scan. The result was that I needed a biopsy to find out exactly what was wrong.

Because of this situation, I was very worried about my health. I attended around six sessions with Freddie, in which he practiced the Sacred Agnihora Fire Healing on me, the ceremony or ritual that includes mantras and other things, that Freddie knows very well. During these sessions and after, I felt an incredible peace in my soul, amazing relaxation, like somebody was telling me that I should not be worried about anything. All of

this happened before the biopsy.

My doctor called me Monday morning to give me the good news that my right lung was healed, and there is not anything wrong or malignant on it.

I have been thanking God for this miracle, Freddie for all his prayers and the Agnihotra Fire Healing, my husband for taking me to Freddie, and all people that prayed for my health.

Mr. Raj Kumar Awasthi
Chakkushahri - Hasanganj
Unnao, Uttar Pradesh, India

Problem: Eczema

We have been doing Homa Therapy for the last two years and since then we do not need any more allopathic medicines. My health is now very good and nobody can see that I am already fifty years old. My mother is also very healthy, in spite of her old age.

My uncle was suffering from severe skin disease (eczema) for several years and all the different kinds of treatments he used, could not solve his problem. Only when he started using the Agnihotra ash, his problem disappeared.

The uncle of Mr. Raj Kumar Awasthi is happy to have been cured from his skin problem thanks to Homa Therapy and Agnihotra.

Donna Scott (r) with husband Michael and daughter Karlie. They are teaching Agnihotra in California and other parts of the USA.

Donna Scott
Santa Clarita, California, USA

Problem: Asthma

My name is Donna Scott. I used to live in Charlottesville, Virginia, USA. I was very sick. I went to the top pulmonary specialists at the University of Virginia. They showed me an X-ray of my lungs. My lungs were completely black except for a little spot the size of a dime that was clear.

After that I started doing Agnihotra. Within the first week I stopped taking all my medications for my asthma, my inhalators, my steroids.

Then three months later, I went back to the doctor. He took an X-ray of my lungs and said, "I don't know what you did, but your lungs are completely clear and you don't need any of the medications anymore." I told him about Agnihotra and he said, "I don't understand it, but it worked."

Homa Organic Farming

Homa Organic Farming injects nutrients into the atmosphere to prevent disease and attract natural predators of harmful insects.

Ancient science of Homa Therapy states that more than 75 % of nutrition to plants and soil comes through the atmosphere. If you make the atmosphere more nutritious and fragrant by Homa a type of protective coating comes on plants and diseases; fungi, pests, etc. do not thrive. Plants' capacity to breathe increases and the toxic effect of choking to death due to atmospheric toxins is eliminated.

The basic tool in Homa Therapy is Agnihotra, a small fire prepared in a copper pyramid exactly to synchronize with arrival of the first rays of sun at sunrise, for example. The first rays have a purificatory effect on the whole atmosphere. Following is a description of sunrise given in ancient technologies.

"At sunrise the many fires, electricities, ethers and more subtle energies emanating from the sun extend all the way to the earth and produce a flood effect at those coordinates where the sun is said to rise. Is is awesome. The flood enlivens and purifies everything in its path, destroying what is impure in its wake. This torrent of life-sustaining energies causes all life to rejoice. At sunrise that music can be heard. The morning Agnihotra Mantra

is the essence of that music. It is the quintessential sound of that flood. At sunset the flood recedes. "

We have enough documentation covering hundreds of hectares where Homa effects on farming, soil, plants, water are experienced. Also Agnihotra ash medicines to cure human, animal and plant diseases are well known. Agnihotra as a tool in psychotherapy is well established.

It is stated in ancient tradition that by giving nutrition to soil through the atmosphere several things could be achieved. We have not tested these things but have seen the overall effects. Following are some examples:

--Due to pollution, cancer-producing elements are found in the soil, water, air. Agnihotra can reduce the effect of these elements on the atmosphere.

--Due to pollution insects show a trend towards mutation. It becomes terrible when the mutation begins to multiply. Insects attack crops and destroy them. They have no predators. If you add to this drought, floods and other disasters people will starve. Agnihotra atmosphere is the only way out.

From Vasant's Correspondence

-- Increase in parasitic bacteria due to pollution robs the earth of its nutrients. Agnihotra atmosphere preserves the nutrients and replenishes them.

--Due to pollution insects begin cross-mating and hybrids are created. Insects begin to change their life cycles and develop immunity to cold. This greatly increases population growth among pests and we have tremendous problems with crops and diseases. Agnihotra reverses this trend and puts nutrients back into soil.

--Composition of nutrients in soil deteriorates and this has a great impact on food supply. The chemical and molecular structure of bacteria change and they become more immune to conventional medical methods. If we practice HOMA Therapy farming things will improve.

--When radioactive particles and poisonous gases are released from the earth's core our only protection is HOMA Therapy.

When we no longer find fault in others, then we are cleansed ourselves of the greatest of all faults. Then in accepting others where they are, this does not mean we "agree" with them; we do not find fault with them. We are most compassionate but we do not condemn anyone; neither do we interfere with another human being's karma. If someone is about to injure himself or others then we have a karmic duty to alert him to any danger, but we never condemn anyone for any reason. Almighty does not condemn.

When you practice Daan you need not worry. What you give of yourself returns to you again and again. There is no end to Grace.

Force will only negate what one is attempting to do. Never force your will on another human being. It is a severe mistake when that is done. Then we carry the burden, the Karma for that action

When one is told, for example, "Grace will provide", one can choose to sit back and wait for grace to operate without making much effort. Then that is essentially expectation and not surrender. Then one can always blame the Almighty if his goal is not actualized--that is if, in his mind, Grace has not provided for him. Grace always will provide but better you make honest efforts in the direction of higher goals. Then automatically

Grace is activated by that effort. That effort is Love thy neighbor as thyself.

There is a strong connection between Cuzco, Machu Picchu, Elqui Valley in Chile, Bhru-gu Aranya in Poland and Maheshwar in India.

Fivefold Path is not a path for Sunday worshippers but a path for all days. One can lead a normal life with job and family and still make the spiritual path his priority. This is the purpose in life. Service. If one can pay heed to one's spiritual path and requisites thereof in all times of life, the well of inner strength will be like a reserve water tank in times of drought. It will be full enough to supply not one but all who come.

You know the aim of spiritual development is not to love the Guru more or even to physically care for the Guru more. Look. There were those near Parama Sadguru Shree Gajanan Maharaj, who cooked for Him, cleaned for Him, carried Him from place to place etc., and yet they were not so highly developed from spiritual point of view. There was jealousy, self-importance, even arrogance among His devotees in those days. Then, on the other side of the world, someone even perhaps who has never met Him while He was in the physical body was receiving highest blessings, benedictions for their travels to spread His word. So you see how it works.

There are no barriers. There are no locked doors. Parama Sadguru is always near. Always near.

All over the world problems exist between people. On spiritual path there may be more problems, not less. At least we know there will not be less. It is human nature. So knowing this, may you all aim high to become always full of love. Always full of love. If you see a blemish in your character know that We see this same blemish but We always love you. So you do the same with yourself and all others. This is the path of Light. Seek to improve yourself. Be humble.

In this life, all are given choices. In any moment a choice can be made. There are those who, when faced with choices, are unable, seemingly unable to decide. Those who cannot decide remain in a state of limbo. In this inactive state, the soul suffers greatly.

Refine those characteristics which are more rough for the people. Let the outward display of emotions reflect the inner Light. Display only the positive, never the negative. Cultivate patience and tolerance of others. We know who you are. Others know what they see. To better enable these others to see more clearly the Light, simply allow what is inside to come out.

FIVEFOLD PATH for Happy Living

1. Perform **AGNIHOTRA** for purification of the atmosphere which leads to automatic purification of mind.

2. Practice **DAAN** (sharing of assets in a spirit of humility to reduce attachment to worldly possessions).

3. Practice **TAPA** (becoming better managers of our energy expenditure by training the body and mind to react to all circumstances in life with Total Love).

4. Perform **KARMA** (every action for self purification only and thus no expectations which bind us to the material world).

5. Practice **SWADHYAYA** (Self-study) for liberation. Who am I? Why am I here? My work on this planet is to learn to react with total LOVE with each opportunity given to me.

This is the Fivefold Path for happy living on the planet. By practicing the Fivefold Path you become better members of your society, group, religion, community, etc.
