Noma House Community Cooperative Painting Project

Jamal Wilson, Baltimore Maryland USA

Today there is a resurfacing of ancient ways being discovered through new technologies available to archeology. There is also a resurgence of ancient lifestyle. The 10th Kalki Avatar, Parama Sadguru Shree Gajanan Maharaj resuscitated the system of correct living for the benefit of humanity. It was REVEALED time.

During ancient days, great ones would gather in the area now called Parama Dham in Madison, Virginia. This information is revealed knowledge. This place is particular for its interconnectivity to many other important light grid points harmonizing the functioning of life support systems throughout the earth and beyond. This is the real Matrix.

A community of like-minded persons has relocated to this area of the Earth to maintain the sacred small, but immensely important and powerful, pyramid fires. These small specific pyramid fires are at the base of the scientific maintenance of the special energies that pour into the area matrix harmonizing all life.

Among the community members, Maria Broom and Noni Faruq, together, have purchased a wonderful piece of property with a community service building in its center. This building is affectionately called “Noma House”, named after both of them.

They allow others to hold different kinds of sharing activities there at minimal costs, so the greater humanity can experience the atmosphere produced in this ancient/modern place of healing, peace, and love.

Although there is a very special building, Parama Dham (House of Almighty Father) very nearby where morning and evening Agnihotra pyramid fires are maintained, as well as a room for performing continuous healing fires, pyramid fires are freely performed in Noma House as well. Consequently, as you can imagine, the white walls soon become darkened with the residues of the healing smoke from the healing fires.

Members of the community cooperatively came together on the Summer Solstice to air the projects on their hearts, which might improve the service intentions of its residents. The first project on the hearts of all was to give assistance to the community gathering and service center, Noma House.

In a heartbeat, fifteen people volunteered to come back together to Parama Dham, Madison, Virginia on Saturday, June 28th, 2003 at 9 A.M. with paint gear to paint the entire interior of Noma House.

John Haggerty, Stuart and Gabi Masill, Sean and Hendaya Haggerty, Christopher Broom,

Richard and Lisa Powers, Elwood Wilson, Atiya Stancil, Freddie Lawrence, Kimberly, Tom Couto, Ryan Couto, James Couto, and Jamal Wilson participated.

The most amazing thing about the entire painting experience was that no one became the boss. There was the most incredible showing of respectful feeling from one person to the other. The effort of divine service from each person was immensely appreciated.

All gathered to perform the 12 noon pyramid fire, followed by the fifteen-minute chanting of Gayatri Mantra. You can just about imagine the power of peace and happiness, and the infusion of divine love energy experienced. As we strove to serve The One, the synchronized beating of our hearts infused sweetness and gentleness into the atmosphere.

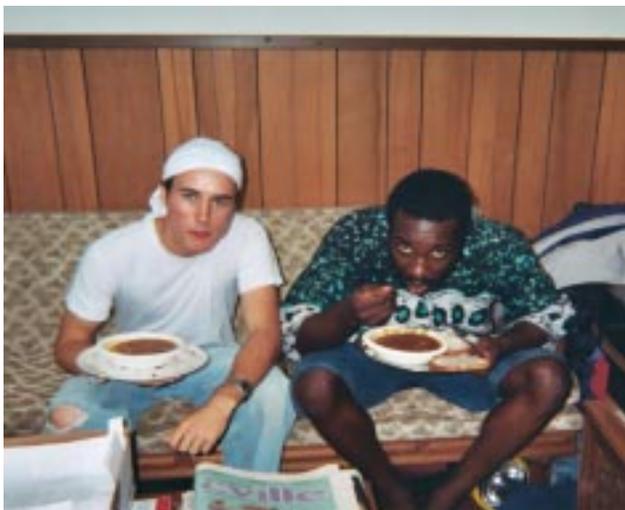

Freddie Lawrence, John Haggerty & Hendaya Haggerty during 12 noon Homa & chanting

We decided to continue to paint until a 1 P.M. break for lunch at the Powers'. During this break, so many independent unplanned positive things occurred. Kimberly, who is in love with the drying of cow dung for burning in the sacred fires, got a detailed tour of John Haggerty's new cow dung manufacturing operation. She is looking to duplicating John's cow dung drying efforts at a site near Baltimore, Maryland in the near future. James Couto insisted that Kimberly be escorted to the sacred trail leading down to the Meditation Rock above White Oak Lake, where Agnihotra and other healing fires are offered to the biosphere by Stuart. Later, Kimberly related to me that she had received several different messages from her guides

as she silently walked through the Feng Shui area that Gabi and Stuart have designed and maintained leading down to the site.

Sean and Elwood performed 12 noon pyramid fire in the back of our van. They then had a tremendous sharing that demonstrated a feeling of togetherness. Elwood was moved to come and join us for the 3 o'clock pyramid fire held on the veranda of the Homa House, led by Ryan Couto. Sean later presented a gift to Elwood to honor the sharing moment.

Much sharing and gift-giving happened behind the scenes between members of the assemblage.

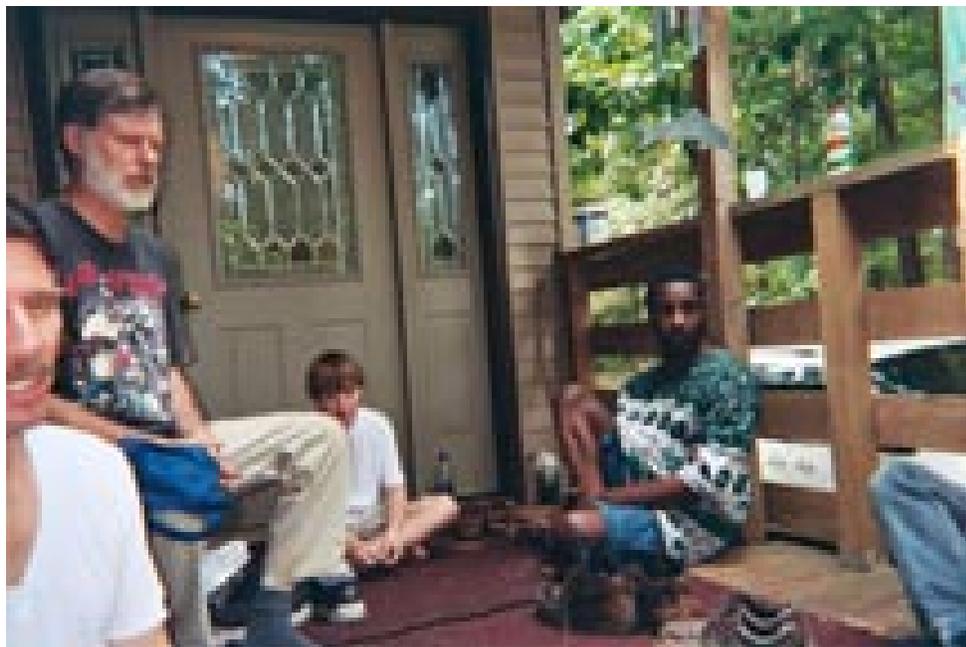

Sean Haggerty & Elwood Wilson during lunch break

We continued to paint throughout the house with everybody doing just what was needed at a particular time. It was truly amazing to be amidst such divinely inspired cooperation.

Before we knew it, it was after 5 P.M. We started putting things back in place and washing windows, doors, floors, rugs and woodwork in preparation for performing a closing silent meditation at 6 P.M. Christopher Broom led this healing pyramid fire offering. After the fire expired, Christopher requested that everyone spend a few minutes in silent meditation visualizing Shree Maharaj with former Agnihotra Press employee Joni Flitt who is presently hospitalized in Baltimore, Maryland.****

The joy at the parting of ways was memorable. We planned to gather again the next Saturday, July 5th, 2003 to complete the painting of the service center Noma House.

(Joni Flitt died of cancer on August 4, 2003.)

Some experiencies with Homa Therapy

I am married to Gaby and we have four children: Mario, Marcela, Rafael and María Elisa.

I greet everyone in light, peace and love and may health and prosperity be with us all through Agnihotra.

I have been practicing Agnihotra for twenty years together with my family. We also do the Om Tryambakam fire.

Here are some of our many experiences with Homa Therapy in agriculture.

My house has a patio of fifteen meters and the soil was so hard that the pick or the hoe would bounce off it. In this patio I have a

space approximately three meters long where I now cultivate vegetables (sweet corn, potatoes, beets, broccoli, tomatoes, root crops, lettuce) using Agnihotra ash as a fertilizer. I put the ash in a cotton bag and let the hose with the water run through it. I also fumigate the plants with the Agnihotra water ash solution to avoid plagues and diseases. I have one bed (1.5 square meters) with parsley and one with cilantro. I treat them like you have to treat any other vegetables, but only fertilize them with Agnihotra ash and the production is so much that I can share with my neighbors. Some of them also participate in Agnihotra and use ash.

We have several trees, among them lemon, lúcuma, two cherimoyas, a fig tree, an olive tree and between them vegetable cultivations. I water them with Agnihotra ash and give each tree a little ash, so they do not need any other fertilization. For example, the lúcuma tree is only two meters tall, but I have to put logs under the branches, the harvest is so heavy. The lemon tree gives us lemons the size of a tennis ball. The skin is thin and they are juicy and do not have seeds. The cherimoya tree gives fruits of almost a kilo in weight and the size of a soccer ball. And the fig tree is incredible. If you eat one of them it is as if you had eaten lunch; they are almost of the size of an avocado and very juicy and sweet. All these

things are benefits through the Agnihotra ash. Besides composting them with the ash I also powder them with the ash and practice continually Homa Therapy.

My friend, who has a lemon plantation, told me that it is affected by the lice plague. I told him to spray Agnihotra ash water on them. After several months we met again and he told me, "The disinfectant you gave me against lice was very little and so I had to use some chemicals. The plants now are losing their leaves and are drying up. I told him not to worry, that I have more Agnihotra ash to fumigate the trees. The next day we cut all the dry twigs and branches and fumigated with the Agnihotra ash water solution, which I had prepared a few days ago for my own garden. Six or seven days after that the trees started to sprout again. It was as if the trees had never been sick. They had a special shine on their leaves and they had many flowers for future fruits, thanks to the Agnihotra ash water.

Another direct experience I had proves the efficiency of the Agnihotra ash for agricultural purposes. A friend had a lemon orchard of about 100 square meters with one olive tree heavily attacked by a pest. We applied Agnihotra ash and the tree rejuvenated completely. We also put the ash on the surrounding trees to prevent the spreading of the pest. Once more the ash proved its power in healing and prevention.

Another very good experience was with an avocado plantation. Avocado trees are very delicate; even a strong wind can break the branches and the tree is prone to contract any disease. One afternoon I passed by a friend and he showed me their orchard. I noticed that the leaves were yellowish. I explained Agnihotra to him and the use of Agnihotra ash, but he said he could not risk anything, since he had made a huge investment on this land. So I proposed that he leave 4 rows of trees for me and my treatment and the other 40 or 50 were his. I said that I would harvest more in those 4 rows than he would in the rest, in proportion to the land. So we did it. My wife, my friend and I did Agnihotra on three different spots. We also did a couple of hours of Om Tryambakam Homa daily, besides treating the trees with ash powder, fumigating them with the ash solution and giving them ash fertilizer (Om Tryambakam ash). After a short time already we could see that the avocado trees became the same shiny and healthy leaves as the plants inside our house. The plants treated with agro chemicals showed yellowish leaves and did not look well at all, so he finally decided to go completely with Homa methods. Well, we never have anymore a shortage of avocados in our home. Our friend keeps supplying us. Things like this can happen anywhere, where Agnihotra, the science of resonance, is used. The results are really optimal.

After applying Homa Therapy for 3 months:

1. Our farm is now much greener and there is a decrease in plagues and diseases.
2. The flowers of the bitter “Pacay” are more in number, bigger and with abundant flowering, early in time.
3. We do not have the disease “rancho” in our potatoes.
4. The pumpkins are greener than usual, have a good size and don’t have “hielo”. These pumpkins usually do not grow without fumigation. The product is superior to that of other farms, which have better soils.
5. The moisture stays in the soil better and the soil is softer. Now the soil does not harden any more with the rains.

6. Two cows that had “hematuria visical” have been healed with Agnihotra ash
7. The cows have no longer ticks.

10 In spite of not practicing at all the Om Tryambakam Homa, but using Agnihotra

alone we have been able to observe in a short time:

There is a reduction in the attack of the “Acarus del Tostado” in citrus fruits.

The papaya cultivation that we have planted, when we started Homa Therapy is completely healthy. There are no plagues or diseases in this plantation.

I have visited an adjacent cotton field and it is totally healthy. There is a lot of biological control. An absolute (100%) control is observed over plagues and diseases.

The bean cultivation is totally healthy. It has developed a natural, biological control. We previously have had always problems with this crop. The last crop was attacked at the end with “Odiosis”, even though we sowed it with manure, used fertilizers and pesticides.

For the first time it has been observed that our sheep jump the fence the same day they are born, because they are bigger and have more vitality, even though through the economic crisis we are not able to give them any concentrate or anything of that type. And we have had only females.

Tocache, 28th of April , 2000

Engineer Sara Carrion Vega
DIRECTOR OF THE AGRARIAN AGENCY -
TOCACHE

Mrs. Directress:

I greet you very cordially through the present letter and at the same time take advantage of the opportunity to thank you so much for the opportunity given to me to work with an ecological and organic technique called Homa Therapy in the upbringing of my cattle. In this technique no chemical substances or veterinary products are used. The results are wonderful and achieved in a very short time. It is really surprising, but the execution is very easy and most important, extremely economical.

I tell you, Mrs. Directress that I am still astonished by the fast healing through the effect of the Homa Therapy. We carry this natural technique out in order to maintain my cows health, but at the same time I feel that my personal health and the health of my family is improving day by day. I should mention that this Homa technique returns the health to all beings that are put within reach of its effect, mainly during the moments of Agnihotra, the fire with highest healing quality. The ash that is left is medicinal.

Before practicing Homa Therapy I was heart-sick and under constant stress. I was not in good health. I was bothered by chronic arthritis that affected my knees. My mother suffered from permanent hypertension and

both of us have had to take chemical medications for many years.

Added to this was the constant worry about my condition as a cattle farmer in the Alto Huallaga Zone, area of Tocache. Raising cattle in low forest location assures a high presence of plagues and illnesses in the bovine livestock. The most important problem at sanitary level is the presence of ticks. In order to control this plague I used chemical products, but their effect was temporary; they appeared again in a short time. On the average I spent \$2,000 every six months on veterinary products based on chemical substances for my 500 head of cattle. My other three cattle farms were in the same condition.

You know, Mrs. Directress, that the tick is an insect that produces a viral disease called "Piroplasmosis". The treatment with veterinary products is based on antibiotics and for a cattle raiser of the Amazons it turns out to be very expensive. So in most cases, for lack of economic resources for quick control, the affected cows run the risk of dying.

This viral disease called "Piroplasmosis" attacked a pedigree bull from one of my cattle farms. This pedigree bull of approximately 4 years old was brought as a baby from Texas, United States. It cost \$5,000 and is worth \$50,000 today. For a long time I

had sold the offspring of this Texan bull, called "Nene" (Baby), to all the cattle ranchers of the County of TOCACHE and adjacent areas. The bull "Nene" had already fallen on the ground from this disease and seeing this, more than 500 cows mooed desperately; it was a terrifying picture. We started treating "Nene" with Homa Therapy; I won't forget what happened to the most loved bull of all my cattle. He was given Agnihotra ash through opening his mouth, and he was given Agnihotra-ash-water solution. He took about one liter, but with difficulty. We also put a Yantram on his neck. This happened at about 5 P.M.

We went to see "Nene" the following day at about ten in the morning. To our astonishment he was moving his tail and his head and he had already taken water and hay. The workers told us that the bull woke up healthy. So we can say that Homa Therapy healed "Nene" in less than twelve hours. After noon "Nene" insisted on leaving the electric fence and went to look for his own grass. It made me very happy to see Nene eating with a lot of voracity in the pasture as if he had never been sick. Thanks to the Homa Therapy I still have my Nene and he has already gotten fierce again, but that's how he is. His absence would have left a very big hole in the cattle raising and within us, besides the economic loss. His parents are natives from Germany

and have a value of more than \$250,000. I want to point out that I didn't have the expense of any veterinary products.

Mrs. Directress, I should inform you, that I now manage the raising of my bovine livestock only with Homa Therapy. Even my mother and I have stopped consuming pharmaceuticals. We take only the Agnihotra ash and have wonderful results.

All this information is for your knowledge so that many other cattle farmers can be helped, who are in the same desperate situation as I was before I started Homa Therapy. I also keep my cattle farm as a model for Homa Therapy, so that government agencies such as you direct, or SENASA (National Service of Agrarian Sanity) can take it as demonstration area for Homa Therapy.

CORDIALLY,

With the application of Homa Therapy I see my plants are now more beautiful--all my plants and flowers, mangos, lemons and avocados. They are as beautiful as if we had applied manure, but we don't give them anything but the treatment with Homa Therapy, that is Agnihotra fire at sunrise and sunset and four hours daily of Om Tryambakam Homa and on full moon and new moon we do 24 hours of the Om Tryambakam fire. The whole family joins.

In the lemon trees I have not seen any problem, neither with the white louse, nor with the "Acarus". In the previous years we have had many problems. All the plants are being regularly fumigated with the Agnihotra-ash-water-solution.

Insomnia

I am a teacher, and I have been a vegetarian for a long time. From the first time I did Agnihotra, it fascinated me. I loved what I felt. It is wonderful.

Even though I am a vegetarian I could not sleep, I took valerian, medicinal herbs (toronjil) and things like that to help me sleep, but I would wake up at 3 in the morning. I stayed up for an hour going around. But now it is no more like that, I sleep very well.

- Infertility**
- Bad Temper**
- Alcohol**
- Fighter**
- Womanizer**

I met with the Homa Therapy in the year 1998 and I began to practice the fires. I was then a completely different person than what I am today. I was a drunk, fighter and womanizer--everything you can imagine, but nothing good. All changes were provoked when I started with the fires of Agnihotra and the Om Tryambakam Homa. All that is left now, is my consciousness about those times. I cannot return to the liquor, it no longer

agrees with me. Neither will I be able to get drunk every day of the week like before, because that stage is overcome, thanks to the Agnihotra fire and to God, who is always the mediator.

Now at home there is so much harmony, one lives better and there is not so much tension. After all, being drunk is not being in the best position to give orders to a worker. One does not give them in due form and then the worker does not fulfill his job properly either. Our whole situation has improved with the practice of Agnihotra.

Another great experience is that I have three children, a daughter who turned 24 years old and is studying Biology and a 20 year-old son who is also studying in the university. After them we decided not to have any further children and my wife had her fallopian tubes tied. We supposed that we would not have further children. Starting with the fires and after the earthquake which happened here in Armenia, my wife became pregnant. What a great surprise for all! And what came into our family is the most beautiful thing there is in my life. She is a beautiful girl, called Sofía. She is a very special being in her qualities and capacities, and all the love that she brings and spreads all around her. She is a girl, very beautiful, very divine. She is a very intelligent being. She does things that other

children her age normally do not do. She converses on any topic and uses terms that we don't know from where she has taken them. She likes the Agnihotra fire a lot and knows the Mantras. Sometimes she reminds us when we get close to the hour of the Agnihotra.

FIVEFOLD PATH for Happy Living

1. Perform **AGNIHOTRA** for purification of the atmosphere which leads to automatic purification of mind.

2. Practice **DAAN** (sharing of assets in a spirit of humility to reduce attachment to worldly possessions).

3. Practice **TAPA** (becoming better managers of our energy expenditure by training the body and mind to react to all circumstances in life with Total Love).

4. Perform **KARMA** (every action for self purification only and thus no expectations which bind us to the material world).

5. Practice **SWADHYAYA** (Self-study) for liberation. Who am I? Why am I here? My work on this planet is to learn to react with total LOVE with each opportunity given to me.

This is the Fivefold Path for happy living on the planet. By practicing the Fivefold Path you become better members of your society, group, religion, community, etc.
